SUMMARY

Aspiring Financial Analyst with a strong foundation in Finance, Economics, and Data Analytics, passionate about transforming complex data into actionable insights. Experienced in quantitative analysis and financial markets, with an additional edge as a financial content writer capable of communicating intricate concepts with clarity and precision. Proven discipline and performance under pressure through active involvement in institutional extracurriculars. Seeking an internship opportunity to apply analytical and communication skills in a dynamic, real-world financial environment.

EDUCATION

Sri Sathya Sai Institute of Higher Learning, Prasanthi Nilayam, Andhra Pradesh 2025 – 2029

BS Finance, Economics and Data Analytics

CGPA: 8.4 / 10 (as present)

Sri Sathya Sai Higher Secondary School, Prasanthi Nilayam, Andhra Pradesh 2025

Class XII – Commerce (MAE, Informatics Practices)

Percentage: 94.4%

Sai International School, Bhubaneswar, Odisha 2023

Class X

Percentage: 90.2%

TECHNICAL SKILLS

Languages: Python, R

Databases: MySQL

Visualisation & Analytics: MS Excel, Microsoft Power BI, Matplotlib, Pandas

Developer Tools: GitHub, VS Code, PyCharm

PROJECTS

India's Union Budget Analysis – FY15 to FY26 March 2026

Academic Project | Stack: Microsoft Power BI

- Studied 12 years of Union Budget data to track shifts in government revenue, expenditure, and fiscal deficit using Power BI dashboards — surfaced patterns in public spending that are not obvious from raw tables.
- Built an interactive dashboard mapping the relationship between INR exchange rate, CPI, and inflation, which helped visualise how currency fluctuations fed into macroeconomic instability during key fiscal years.
- Drew conclusions on budgetary efficiency across political cycles, grounding observations in data rather than commentary.

US–Iran Conflict: Geopolitical & Economic Impact Analysis February 2026

Personal Project | Stack: Python, Pandas, Matplotlib

- Mapped 47 years of US–Iran tensions — nuclear escalation, proxy warfare, casualties, and humanitarian fallout — using Python-based visualisations to make a complex history readable at a glance.
- Quantified the conflict's economic footprint: oil price spikes, equity market drawdowns, inflationary pressure, and the gradual collapse of Iran's trade position under successive sanctions regimes.
- Wrote a long-form research piece distilling the analysis into plain language, later used as a reference by peers in the department.

Food Ordering and Restaurant Management System July – December 2024

Academic Project | Stack: Python, MySQL, Pandas, Matplotlib

- Built a full-stack food ordering system from scratch where customers could browse menus and place orders, while owners got a dashboard to track sales, manage staff, and update items in real time.
- Handled all backend logic in Python and used MySQL for transaction management, keeping data consistent across concurrent operations.

- Designed the system end-to-end, from database schema to reporting views, simulating how a small restaurant would actually run day-to-day.

EXPERIENCE

Arthashastree's Club – Internal Forums & Academic Development Cell

September 2025 – Present

Sri Sathya Sai Institute of Higher Learning

- Organised colloquium sessions bringing in alumni and senior government officials to speak on real-world finance and policy challenges — coordinated scheduling, outreach, and on-day logistics.
- Helped the club build a roster of speakers from industry and public service, strengthening the department's external network.

Content Creation and Teaching

September 2025 – March 2026

Mitraz Foundation

- Created study materials and lesson plans for government school students, focusing on breaking down abstract concepts into formats that stuck.
- Taught and mentored students directly during sessions, adapting explanations on the fly based on how the class was responding.

CERTIFICATIONS & ACHIEVEMENTS

- **Gold Medal:** SOF International Commerce Olympiad (ICO) Nationally recognised academic competition; awarded for outstanding performance in Commerce, demonstrating strong analytical aptitude and subject-matter expertise.
- **Microsoft Excel 2016 - Introductory:** Proficient in spreadsheet design, formula building, and structured data handling for financial and analytical workflows.
- **Analysing and Visualising Data with Microsoft Power BI:** Skilled in interactive dashboard creation, data modelling, and deriving business intelligence from complex datasets.
- **Intermediate R for Finance:** Hands-on experience with data manipulation, custom functions, iterative loops, and end-to-end financial analysis workflows in R.
- **Introduction to R for Finance:** Grounded in R fundamentals including data structures, statistical computing, and financial data handling.
- **Working with Dates and Times in R:** Competent in time-series data management, formatting, and chronological analysis which is critical for financial modelling and market data work.

EXTRACURRICULAR

- **Brass Band Member:** SSSIHL Brass Band Performs at institutional cultural and ceremonial events as part of a large ensemble. Developed discipline, precise coordination, and the ability to deliver consistent performance under pressure before large audiences. Strengthened collaborative skills including active listening, adaptability, and collective accountability through rigorous group rehearsals and live performances.
